III. PUBLIC HEARINGS

- A. Boundary Line Adjustment Agreement moving approximately 68.866 acres from the unincorporated area of the County of Montgomery into the incorporated Town of Christiansburg. The proposed boundary adjustment area is commonly known as Falling Branch Corporate Park, Phase II, Parcel 2, Tax Parcel 94 – ((A)) – 8; Parcel ID 004061 (formerly the Cox property) and is located on the southern boundary of the Town of Christiansburg, west of the intersection of Technology Drive S.E. and Parkway Drive, S.E.

Chris Waltz, 1370 Rigby Street, expressed concern that the Town's spending was excessive. Mr. Waltz spoke about the \$300,000 the Town was allotting for the proposed boundary line adjustment and expressed the County had received more funds for infrastructure than the Town

and questioned why the County could not pay the \$300,000. He compared the Town of Christiansburg to the City of Roanoke where minimum wage had been raised for their employees to \$15. an hour, and he also expressed a suggestion for the Town to raise their employee's hourly wages.

Mayor Barber expressed that the cost for the new infrastructure was approximately \$2.4 million, and the county would be responsible for that cost, minus the \$300,000 the Town would grant. Mr. Barber also explained that the said project had been in discussion by Council since 2018.

V. INTRODUCTIONS AND PRESENTATIONS

- A. New River Valley Airport Manager Aaron Brummitt and Airport Commission Chairman Nick Glenn to present on airport operations and a funding request for relocation of utilities and hanger construction.

Aaron Brummitt, Airport Manager, addressed Town Council concerning the NRV Airport and noted the airport was currently working on their master plan update which details the development future of the airport for the next fifteen to twenty years. Mr. Brummitt explained they were focused on infrastructure needs for the airport as well as integrating with the Commerce Park that was adjacent to the airport. Mr. Brummitt stated that Target and Corning both were airport users. He spoke about the Gulfstream 700 Aircraft, the airports future C-3 design aircraft, and the importance of maintaining the aircraft to secure FAA funding and explained the airport was studying a hanger for this size aircraft. Mr. Brummitt explained that the adjacent site would accommodate a 140 by 160-foot structure to accommodate larger aircrafts. He referenced a map showing the existing water and sewer lines and the potential relocation for those lines. He explained that the water and sewer lines would be relocated to go around the proposed site instead of underneath. Mr. Brummitt relayed the estimates for the total site project and noted that the Virginia Department of Aviation would assist with part of the project. He explained that the utility relocation, estimating at approximately \$209,000 was not eligible for the Virginia Department of Aviation funding. He stated other localities that participate in the airport were receptive to the relocation for hanger site utilities and were reviewing the request. He noted that Pulaski County and the Town of Dublin had approved their request and currently the airport was waiting on Giles County and the Town of Pulaski to participate. He added that the airport still needed to meet with Montgomery County and the City of Radford.

Councilwoman Hicks questioned if there was any liability for the Town of Christiansburg. Mr. Wingfield explained that an authority was a separate entity from the Town, so the Authority would have their own liability insurance. Councilwoman Hicks asked how the money from the Town would benefit the airport's budget, and if it would decrease the amount of money given to the airport each year. Mr. Brummitt explained that the airport's long-term goal is to be a self-sufficient airport but explained they were still, like everyone else, recovering from the pandemic. Councilman Showalter asked what the total commitment of the Town of Christiansburg would be for the new infrastructure. Mr. Brummitt explained the total cost would be a one-time maximum amount of \$18,797.21. or 8.99% of the project, in addition to the annual grant from the Town. Councilman Showalter questioned if the Authority was expecting to see a decrease in the Authority members costs annually. Mr. Brummitt explained it would be a year-to-year basis and traditionally the payments had gone up between three and five percent per year. Councilman Showalter asked what clients the airport had that benefited Christiansburg. Mr. Brummitt explained that most businesses do not reveal a great deal of information to the airport. Mr. Brummitt concluded that the airport would be happy to give facility tours to any Council members that were interested.

- B. Finance Director/Treasurer Valerie Tweedie to present Fiscal Year 2021-22 Budget Amendment #7.

Mrs. Tweedie addressed Council and explained that this presentation was primarily a rollover of the Town's capital project funds, and the majority was capital projects that had already been approved in the earlier budget. She explained that the Town estimates the amount of money that would be spent in those projects before the end of the fiscal year and the rest is

rolled over into the next budget cycle. She explained that occasionally the Town's estimates are off due to not spending what was estimated or spending more and that is when the budget is readjusted. Mrs. Tweedie talked about the unassigned fund balance and explained that this is where the rollover money is assigned and that now those funds are being placed back into the existing projects. Mrs. Tweedie talked about the Town's capital project funds which are funded primarily from grants and general fund dollars and presented a list of those projects that were being rolled over. Mrs. Tweedie touched on the water and wastewater fund, which is a separate enterprise fund, as well as the stormwater enterprise fund. She explained the stormwater fund had some grant funding in it and most of the water programs did not have grant funding, so these funds did not affect the unassigned fund balance. The other area was special revenue funds which pertained to the Town being awarded two new grants at the beginning of the fiscal year. She explained that both of those grants were revenue and expenditure, so they had no impact on the general fund/unassigned fund balance. Mrs. Tweedie expressed that the Town budgeted conservatively on the meals and lodging tax in this year's fiscal budget because of the pandemic and explained there was an increase in revenue of \$750,000 for meals tax than what was placed in the FY 2022 budget. Mrs. Tweedie explained that the lodging tax had not recovered as well as the meals tax and that number would be left alone for now. She spoke about the increase costs in Public Works due to the prices on items ordered going up substantially, new computers for Town Council, and the request from the regional airport. She included emergency repairs at the Aquatic Center and expanding bus services with Virginia Tech as well as the new software for the Finance department. Mrs. Tweedie explained the incremental rollover amount for the College Street drainage project and noted there was already money in the 2022 budget that had been approved. Councilwoman Hicks added that not all the American Recovery Plan Act money had been assigned and questioned if that could go towards the College Street drainage project or potential raises for Town employees. Mr. Wingfield explained the money needed for the College Street drainage project would depend on the nature of the Town's plan. Mayor Barber explained that the town was still working on the plans for the College Street drainage project, and it was not a quick fix and the town needed to have direction before asking for grant funding.

VI. CITIZEN COMMENTS

Paul Leichner, 160 Alexa Lane, addressed Council concerning the boundary line adjustment request between the county and the town and questioned if the town would receive revenue from the project or benefit from it in any way. Mr. Wingfield stated that the town would receive real property taxes from the adjustment once it was in private property ownership. He explained that currently the Economic Development Corporation owns the property, but the plan was to sell it to an economic development prospect. Mayor Barber noted that currently there was an interested party. Councilman Showalter inquired why the County relinquishes the lots into the Town of Christiansburg once they have a developer. Mr. Wingfield explained there were benefits for any corporation to come into the Town. He noted the water and sewer rates were at 100% versus 150% in the County, as well as receiving Town maintenance of streets, water, and sewer lines. Councilman Showalter commented on the human resource portion as well and expressed it would be a job creator for the community. Councilwoman Hicks questioned how long it would take to recuperate the \$300,000 the Town would pay out. Mayor Barber explained that the project would be a multi-million-dollar facility and the real estate and machinery and tools taxes the Town would receive from it would be where the Town would recover the \$300,000.

Mr. Leichner also questioned the Town being sued by Alleghany Construction concerning the intersection at Cambria Street and N. Franklin Street. Mr. Leichner asked why the Town was being sued and not the Engineering firm. Mr. Wingfield explained that the contract was with the Town.

Don Upham, Riner, Virginia, addressed Town Council and Town staff and thanked them for their service and proceeded to pray over Council for good decision making.
