	<i>Description: Make cuts diagonally across driveway trench width apart. Remove asphalt between cuts. Dig trench >30" from meter across driveway diagonal and across left limit of landscaping to front most left corner of house dig down approximately 36" and bore new hole to enter storage room in basement. Prep new line by running 3/4" CTS HDPE through 1" IPS HDPE. Connect 3/4" to meter and run shielded line through newly bored hole in basement. Install new ball valves and dual check at entry location. Run new PEX line across basement to meet existing entry and connect new line to house main. Cut old water main off at wall and seal. Seal around new line. Bed new line, run tracer wire, and pressurize. Test for leaks. Have line inspected. Bury waterline. Tamp drive and pour gravel base layer for asphalt.</i>
