

POST CONSTRUCTION COMPLIANCE CERTIFICATE

If deviations in design or site configuration were made from the site plan previously approved by the Town of Christiansburg, a list of the deviations must accompany this document. Two full-sized revised final site maps or "record drawings" with associated details must also accompany this document. The Post-construction compliance certificate must be signed and sealed by a professional engineer registered in the Commonwealth of Virginia, and must bear the following certification:

POST CONSTRUCTION CERTIFICATE

I hereby certify that the construction of the project entitled _____, and signed by the Town of Christiansburg on _____ has been completed in substantial accordance with the original and revised (if applicable) plans and specifications on file with the Town of Christiansburg Engineering Department. All deviations from the approved plans have, to the best of my knowledge, been documented in the attached compliance report, and/or on the as-built drawings.

Engineer of Record _____

Date _____

Commonwealth of Virginia PE License Number _____
